-Settings

Admin can either moderate the reported maps or the reported players.
By switching tabs it loads.
Sorted by Number of reports

Reported maps   **Reported players**

Name of the map, PlayerID, Number of reports

Name of the map, PlayerID, Number of reports

Name of the map, PlayerID, Number of reports

Name of the map, PlayerID, Number of reports

Name of the map, PlayerID, Number of reports

Name of the map, PlayerID, Number of reports

Name of the map, PlayerID, Number of reports

Name of the map, PlayerID, Number of reports

Name of the map, PlayerID, Number of reports

Confirm bans

Either he rejects or approves of the report.

Displays relevant info about the Map/Player
For MAP:
MapID, PlayerID, Number of reports.
For PLAYER:
PlayerID, NumberOfReport, Main cause of report.

At the end. He confirms his selections. This allows to make batches of ban.

This is the admin menu. Where administrator of the game can decide whether or not to ban a player from the player/map set. This is comparable to delete player/map from the database. Therefore actions taken here will influence on the database we have.
He can also choose to write an email to the developpers of the app if an issue arises that is concerning.
